

Do You Model Your Business Processes?

Are You Able To:

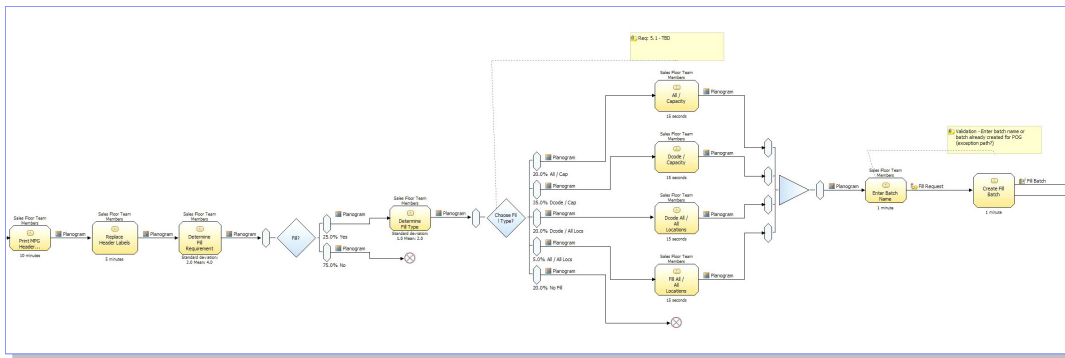

- Streamline BSS/OSS related processes, such as subscriber provisioning and Service Activation?
- Simulate and analyze the cost and duration of launching new products to market?
- Easily adopt standards like e-TOM?
- Package your products and services into bundles which are attractive to generate customer loyalty?
- Change your existing billing and rating process if government were to impose new regulation such as mobile number portability across Telco?

Panic No More. It's Time to Change.

WebSphere Business Modeler Advanced is business process designer and simulator. it helps to fully visualize, comprehend, and document your business processes by providing comprehensive and user-friendly modeling and collaboration capabilities for both Line-of-Business and IT personnel.

Below is the example of the Diagram by using WeSphere Business Modeler Advanced. Thanks to its seamless integration of modeling, workflow building, analysis and simulation features.
